The Company is scheduled to hold a briefing for analysts on financial results on Friday, April 28, 2023 and to post materials used at the briefing on the Company's website on that day.
U.S. dollar amounts are presented for the convenience of the readers. This translation should not be construed to imply that the yen amounts actually represent, or have been or could be converted into, equivalent amounts in U.S. dollars. The exchange rate of $¥ 133.265=$ U.S. $\$ 1$ at the end of the reporting period has been used for the purpose of presentation.

# Operating Performance Highlights and Financial Condition 

## Operating Results Overview

The global economy in the year under review showed stronger signs of a slowdown in China, Europe, and North America primarily due to the protracted Russia-Ukraine conflict, global inflation, and tightening of monetary policy. On the other hand, longstanding supply chain issues have nearly come to an end. Availability of semiconductors and most other parts has dramatically improved. The long distribution leadtimes caused by logistics disruptions have also improved. The future is clouded by uncertainty. There is concern that high inflation and recent turmoil in financial markets could result in serious downside risk due to a decline in consumer confidence and a cooling of household spending and investment. Therefore, we will continue to closely monitor the situation.
The average exchange rates of the yen against the U.S. dollar and of the yen against the euro during the year were $¥ 135.44$ and $¥ 140.90$, respectively. This represents a $21 \%$ depreciation of the yen against the dollar and an $8 \%$ depreciation of the yen against the euro compared to the previous year. The yen also weakened against the currencies of some emerging countries, in places such as China and Latin America.

Against this backdrop, we saw revenue increase to $¥ 1,330.3$ billion, up $17.8 \%$ compared to last fiscal year. This was chiefly attributable to an improvement in product shortages in the printing solutions and visual communications segments, price hikes that kept selling prices high, and the positive effects of a weaker yen. Business profit was $¥ 95.1$ billion, up $6.1 \%$ compared to last fiscal year, despite a rise in manufacturing costs associated particularly with soaring prices for parts, materials, transport, and utilities. The increase in business profit was chiefly due to high selling prices and positive foreign exchange effects. Profit from operating activities was $¥ 97.0$ billion, up $2.7 \%$ compared to last fiscal year. Profit before tax was $¥ 103.7$ billion, up $6.8 \%$ compared to last fiscal year. Profit for the period attributable to owners of the parent company was $¥ 75.0$ billion, down $18.7 \%$ from last fiscal year.

A breakdown of the financial results in each reporting segment is provided below.

## Printing Solutions Segment

Revenue in the office and home printing business sharply increased. Ink cartridge printer unit sales decreased, but unit sales of high-capacity ink tank printers and office shared printers increased. Inkjet printer revenue sharply increased mainly due to continued high selling prices and positive foreign exchange effects. Consumables revenue slightly increased even though ink cartridge sales decreased in conjunction with a decrease in sales of ink cartridge printers and the normalization of at-home print demand. The increase in consumables revenue was largely the result of an increase in sales of ink bottles for high-capacity ink tank printers and positive foreign exchange effects.
Revenue in the commercial and industrial printing business sharply increased. Commercial and industrial inkjet printer sales in China have been slowing due to the economic slowdown, but revenue grew owing to price hikes that kept selling prices high and positive foreign exchange effects. Consumables revenue increased due to the positive impact of foreign exchange rates, which more than offset a decrease in sales compared to last fiscal year, when there was robust demand in North America. Small printer revenue sharply increased due to price hikes in Europe and North America, unit sales growth as product shortages eased, and positive foreign exchange effects.
Revenue in the printhead sales business increased. After being hit hard in the first quarter by lockdowns in China, sales in China in particular steadily recovered from the second quarter onward.

Segment profit in the printing solutions business sharply decreased. Sales were heavily impacted by a decrease in sales of consumables for ink cartridge printers in the office and home printing business and the rise in manufacturing costs associated particularly with soaring prices for parts, materials, transport, and utilities.

As a result of the foregoing factors, revenue in the printing solutions segment was $¥ 902.3$ billion, up $15.7 \%$ compared to the previous year. Segment profit was $¥ 89.3$ billion, down $16.1 \%$ compared to the previous year.

## Visual Communications Segment

Revenue in the visual communications segment sharply increased primarily due to a combination of revenue growth in the firm European and North American education and home markets, an easing of product shortages, which has helped to resolve an order backlog, and positive foreign exchange effects.
Segment profit in the visual communications business sharply increased primarily due to higher revenue and continued cost containment.
As a result of the foregoing factors, revenue in the visual communications segment was $¥ 216.8$ billion, up $36.4 \%$ compared to the previous year. Segment profit was $¥ 34.8$ billion, up $127.2 \%$ compared to the previous year.

## Manufacturing-Related \& Wearables Segment

Revenue in the manufacturing solutions business was in line with the previous year mainly because positive foreign exchange effects offset a slowdown in sales in China.
Revenue in the wearable products business increased despite a decrease in sales of products such as movements. The increase was primarily due to a combination of growing demand from visitors to Japan, strong domestic sales, and positive foreign exchange effects.
In the microdevices business, crystal device revenue increased as a result of growth in sales of products for base stations, higher selling prices, and positive foreign exchange effects, which more than offset decreased demand in the consumer sector. Meanwhile, continued firm demand for semiconductors fueled sharp sales growth. As a result, the entire microdevices business recorded sharply higher revenue.
Segment profit in the manufacturing-related and wearables segment sharply increased primarily due to revenue growth in the microdevices business but also because of positive foreign exchange effects.
As a result of the foregoing factors, revenue in the manufacturing-related and wearables segment was $¥ 215.4$ billion, up $12.2 \%$ compared to the previous year. Segment profit was $¥ 28.3$ billion, up $22.9 \%$ compared to the previous year.
In addition to the above, Epson recognized an impairment loss of $¥ 1.8$ billion in the manufacturing solutions business because it no longer expects to recover some of the investments considering the changes in the market environment and other factors.

## Adjustments

Adjustments to the total profit of reporting segments amounted to negative $¥ 57.3$ billion. (Adjustments in the previous fiscal year were negative $¥ 55.2$ billion.) The main components of the adjustment were basic technology research and development expenses that do not correspond to the reporting segments, and revenue and expenses associated with things such as new businesses and corporate functions.

## Financial Position Overview

Total assets at the end of the fiscal year were $¥ 1,341.5$ billion, an increase of $¥ 75.1$ billion from the previous fiscal year end. While cash and cash equivalents decreased by $¥ 67.8$ billion, total assets increased chiefly due to an $¥ 81.0$ billion increase in inventories, a $¥ 33.5$ billion increase in trade and other receivables, and a $¥ 17.6$ billion increase in property, plant and equipment.
Total liabilities were $¥ 614.0$ billion, up $¥ 13.4$ billion compared to the end of the previous fiscal year. Although there was an $¥ 11.0$ billion decrease in net defined benefit liabilities and a $¥ 9.8$ billion decrease in bonds issued, borrowings and lease liabilities, total liabilities increased mainly because of a $¥ 13.4$ billion increase in trade and other payables and a $¥ 21.0$ billion increase in other current liabilities.
The equity attributable to owners of the parent company totaled $¥ 727.3$ billion, a $¥ 61.7$ billion increase compared to the previous fiscal year end. The main reasons for the increase were that, while there were $¥ 21.3$ billion in dividend payments and a $¥ 30.0$ billion purchase of treasury shares, Epson recorded $¥ 75.0$ billion in profit for the period attributable to owners of the parent company and recorded $¥ 37.8$ billion in other comprehensive income, the primary component of which was exchange differences on translation of foreign operations.

## Cash Flows Overview

Net cash from operating activities during the year totaled $¥ 61.3$ billion (compared to $¥ 110.8$ billion in the previous year). Whereas profit for the period was $¥ 75.0$ billion, net cash from operating activities decreased primarily because of negative factors such as a $¥ 60.2$ billion increase in inventories and a $¥ 22.1$ billion increase in trade receivables, which more than offset positive factors such as the declaration of $¥ 68.6$ billion in depreciation and amortization.
Net cash used in investing activities totaled $¥ 61.6$ billion (compared to $¥ 44.0$ billion in the previous year), mainly because Epson used $¥ 59.0$ billion in the acquisition of property, plant, equipment and purchase of intangible assets.
Net cash used in financing activities totaled $¥ 79.3$ billion (compared to $¥ 51.7$ billion in the previous year), chiefly due to $¥ 21.3$ billion in dividends paid, a $¥ 30.0$ billion purchase of treasury shares, and $¥ 18.0$ billion used in the repayment of long-term loans payable.
As a result of the foregoing, the balance of cash and cash equivalents at the end of the fiscal year, combined with the effects of exchange rate volatility, totaled $¥ 267.3$ billion, down $¥ 67.8$ billion from the end of the previous fiscal year.

## Outlook

The financial outlook for the 2023 fiscal year ending March 31, 2024 is summarized below. The figures in the outlook are based on assumed exchange rates of 129.00 yen to the U.S. dollar and 142.00 yen to the euro. For details, please see the fiscal year 2022 (ending March 2023) full-year financial results presentation that was announced simultaneously with this report.

## Notes to Consolidated Financial Statements

## 1. Note for Going Concern Assumption

Not applicable.

## 2. Segment Information

## (1) Outline of Reportable Segments

The reportable segments of Epson are determined based on the operating segments that are components of Epson for which discrete financial information is available and whose operating results are regularly reviewed by the Board of Directors in deciding how to allocate resources and in assessing performance.
The reportable segments of Epson are composed of three segments: "Printing Solutions", "Visual Communications" and "Manufacturing-related \& Wearables." They are determined by types of products, nature of products, and markets.
Epson conducts development, manufacturing and sales within its reportable segments as follows:

| Reportable segments | Main products |
| :--- | :--- |
| Printing Solutions | Office/ Home inkjet printers, serial impact dot matrix printers, page printers, color <br> image scanners, dry process office papermaking systems, commercial and industrial <br> inkjet printers, inkjet printheads, printers for use in POS systems, label printers, <br> printer consumables, and others |
| Visual Communications | 3LCD projectors, smart glasses, and others |
|  <br> Wearables | Industrial robots, compact injection molders, wristwatches, watch movements, quartz <br> crystal devices, semiconductors, metal powders, surface finishing, PC, and others |

## (2) Revenues and Performances of Reportable Segments

Revenues and performances of reportable segments were as follows. Transfer prices between the segments were based on prevailing market prices.

## 4. Contingencies

Material litigation
In general, litigation has uncertainties and it is difficult to make a reliable estimate of financial effect of the possibility of an outflow of resources embodying economic benefits. Epson does not recognise provisions when either an outflow of resources embodying economic benefits is not probable or an estimate of financial effect is not practicable.
Epson had the following material action.

## The civil action on copyright fee of ink-jet printers

In June 2010, Epson Europe B.V. ("EEB"), a consolidated subsidiary of the Company, brought a civil suit against La SCRL Reprobel ("Reprobel"), a Belgium-based group that collects copyright royalties, seeking restitution for copyright royalties for multifunction printers. After that, Reprobel also brought a civil suit against EEB. As a result, these two lawsuits were adjoined. EEB's claims were rejected at the first trial, but EEB, dissatisfied with the decision, intends to appeal.

## 5. Subsequent Events

No material subsequent events were identified.
