Explanatory Material for chemSHERPA

Rev. 4.3
September. 1, 2025

Seiko Epson Corporation
Global Environmental Strategy Promotion Office

Introduction — Purpose of this document

What is chemSHERPA?

Epson's basic guide for chemSHERPA

Flow for using chemSHERPA-AI to provide information

Enter the general information, the company information,
the composition information, the compliance assessment information and
Save and output authorized data

Flow for using chemSHERPA-CI to provide information

Enter the general information, the company information,
the composition information and Save and output authorized data

Guide to creating chemSHERPA data

Epson's survey on chemical substances in products

Revision History

This document explains the process used by the Epson Group ("Epson") to gather information on chemical substances in products using chemSHERPA.

For the rules on the use of chemSHERPA and the common usage of the tools, see the explanatory materials provided on the [chemSHERPA website](#) or the manuals included with the chemSHERPA-AI/CI Data Entry Support Tool.

This document uses abbreviation to refer to the following terms:

- Rules on the Use of Information on Chemicals in Products Under the chemSHERPA => Usage Rules
- chemSHERPA Data Entry Support Tool for Articles Operation manual => AI Operation manual
- chemSHERPA Data Entry Support Tool for Articles Data entry manual => AI Data entry manual
- chemSHERPA Data Entry Support Tool for Chemicals Operation manual => CI Operation manual
- chemSHERPA Data Entry Support Tool for Chemicals Data entry manual => CI Data entry manual

A scheme that facilitates sharing information on chemical substances in products

Information handling between supply-chain partners is essential for appropriate management of chemical substances in products (CiP), in order to continuously respond to expanding regulations. The chemSHERPA can be used as a common scheme for information handling across a supply chain.

Designed for steady & efficient information handling

Applicable to various products and industries. Throughout a supply chain, from up- to down-stream, this scheme allows organizations to handle the CiP information under a shared policy.

Toward a better information handling and chemical management in a supply chain

The chemSHERPA ensures "responsible information handling" that transfers composition information based on a common substance list, as well as compliance assessment information for articles, striving for a better CiP management in the future.

Source: Getting started guide of chemSHERPA

- ❑ Epson uses the chemSHERPA-AI form for Articles and the chemSHERPA-CI form for Chemicals.
- ❑ Use the version of chemSHERPA-AICI Data entry support tool that is specified on [Epson's Green Purchasing site](#) (usually the latest version).
- ❑ Prepare an answer file based on a request file (".shai" or ".shci" file) that Epson provides.
- ❑ For chemSHERPA-AI form, be sure to transmit compliance assessment information, composition information* and the respective SCIP info.
- ❑ Data should be created in conformance with Usage Rules, manuals, and other documents issued by JAMP.
- ❑ chemSHERPA-AI/CI files should be entered in Japanese or English (single-byte characters).

* Be sure to transmit the composition information so that we are able to promptly respond to rapidly changing laws and regulations and customer requirements on CiP.

Please note that "transmitting composition information" means "entering data for chemSHERPA declarable substance." We are not asking for a full declaration using optional reporting. See page 10 and 23 for details.

Request when entering compliance assessment information and composition information data

If the composition or content rate of CiP changes in manufacturing processes for production materials delivered to Epson, enter the data for the materials at the time of delivery.

Flow for using chemSHERPA to provide information (AI tool)

Items for which Epson has its own rules are explained on the following pages.

chemSHERPA common items are explained in the Operation manual or the Data entry manual.

* "¶.***" indicates the item number in the Operations manual.

AI tool - Enter the general information

★Epson's own procedure

EPSON

General view

★ You must click the **Composition and Compliance** boxes in the **Remarks**.

Unless specific requested Epson,
there is no need to create or lly report FMD.

★ Unless Epson have a special request, check "No"
for substances that are candidates for management.

The Requester block will automatically appear when you import the request file from Epson.

(★ Please do not change the information already filled in the request file from Epson.)
If you uncheck "Information on requester On/Off" and the requester information and the requester product information are deleted, please open the request file again..

The company ID has been entered in the request file from Epson.
★ Do not change the company ID.

The requester information has been entered in the request file from Epson.
★ Do not change the requester information.

AI tool - Enter the composition information

★Epson's own procedure

EPSON

Enter the composition information data

General view

General view

(1) Check the box.

(2) Click "Show" in the CPS column.

Composition information view

Composition information view

- (1) Check the box for the product for which you are providing answers.
- (2) Click "Show" in the CPS column for the target product. The composition information view will open.

- (3) Enter the information. See the Operation manual and the Data entry manual for instructions.

★ **The composition information that Epson asks you to enter is for chemSHERPA declarable substances** (and for candidate of declarable substances * that Epson requires you to enter). **You are not required to enter information for other substances**, such as for a full declaration using optional reporting. And, **You are not required to report FMD uniformly**. Unless Epson specifically request it due to reasons such as the product being used in automotive applications or a request from one of our customers, there is no need to report FMD.

* Candidate of declarable substances: Chemical substances selected by JAMP as chemical substances for which it is recommended to investigate content information within the necessary scope of the supply chain before the chemical substances in the draft stage are added to the chemSHERPA relevant standards for chemical management that are related to laws and regulations.

Enter the SCIP info in the composition information

- (1) After entering the composition information, click the Finalize button. The SCIP information view will appear*.
- (2) Enter the information. See the Operation manual and the Data entry manual for instructions.

	Product name	Component no	Component name	Number	Row	Primary Article Identifier	Article Name	Article Category
1	Parts A				2	1234567	1234567	Select
2								

* Note that this view will not appear if there is no possibility that SCIP info will need to be registered. Instead, the following message indicating that no SVHCs are present will be displayed. Click the OK button to complete the SCIP info entry.

Enter the compliance assessment information data

General view

General view

(1) Check the box.

(2) Click "show" in the CPL column.

Compliance assessment information view

Compliance assessment information view

(3) Click "Convert from Composition."

- (1) Check the box for the product for which you are providing answers.
- (2) Click "Show" in the CPL column. The compliance assessment information view will open.

- (3) Click "Convert from Composition," and the composition information will be converted to the compliance assessment information. (You can also enter it directly without using the conversion function.)
- (4) Enter and revise the information. See the Operation manual and the Data entry manual for instructions.

■ Notes on entering compliance assessment information: Content above the threshold

Enter either "Y" or "N" in the "Content above the threshold" column as you check the Subject substance, Reportable applications, and Reporting threshold. Otherwise, correct "Entry Y" to "Y" or "N."

Clicking "Batch N" enters an "N" either in all cells or all blank cells.

You can enter a "Y" only where needed and then click this button to enter an "N" in all remaining cells.

Criteria for choosing "Y" or "N" for "Content above the threshold"

* Confirm that "N" is chosen for substances corresponding to Level 1 banned substances (currently banned) under the Epson Group Green Purchasing Standard for Production Materials.

The screenshot shows the ChemSHERPA-AI Compliance tool interface. The main table has columns: Subject substance, Candidate item, ID, Referenced laws and regulations, Reportable applications, Reporting threshold, and Content above the threshold. A red circle highlights the 'Content above the threshold' column, and a blue arrow points to the 'Batch N' button. The table contains various substances like SG001 Asbestos, SG002 Azocolourants and azo dyes, etc.

Amount of substance present	Purpose of substance	Content above the threshold
"Reporting threshold" or more	Qualifies under "Reportable applications"	Y
	Does not qualify under "Reportable applications"	N
	Unknown	Y
Less than "Reporting threshold"	Qualifies under "Reportable applications"	N
	Does not qualify under "Reportable applications"	N
	Unknown	N

■ Notes on entering compliance assessment information: Content rate and other data

Enter the Content rate, Quantity of content, Usage, and Portion used in all rows where you entered “Y” for “Content above the threshold.”

Enter the usage code if a message in the usage code column asks you to enter the data.

The screenshot shows the 'chemSHERPA-AI Article Tool' interface. The 'Compliance' tab is selected. The 'Content above the threshold' column has 'Y' entered for two rows. A red box highlights the 'Usage code' and 'Portion used' columns for these rows, with a red arrow pointing to the 'Y' in the 'Content above the threshold' column. A red box also highlights the 'Usage code' and 'Portion used' columns for the two rows, with a red arrow pointing to the 'Y' in the 'Content above the threshold' column. A red box also highlights the 'Usage code' and 'Portion used' columns for the two rows, with a red arrow pointing to the 'Y' in the 'Content above the threshold' column.

★ Enter the Usage and Portion used if you answered “Y” for “Content above the threshold.”
* Enter the fields in Japanese or English (in single-byte characters).

Determining whether data must be entered

Item	Requirement
Content rate	Must be answered if you answered “Y” for “Content above the threshold”
Quantity of content	Same as above
Unit	Same as above
Usage code	Required if a message in the usage code cell asks you to enter the data.
Usage	★ Must be answered if you answered “Y” for “Content above the threshold”
Portion used	★ Must be answered if you answered “Y” for “Content above the threshold”

■ Notes on entering compliance assessment information: Usage code

- (1) Double-click a usage code cell to open the "Select usage code" view.
- (2) Click the Usage code and press "Select."

- For detailed instructions on using the chemSHERPA-AI/CI Data entry support tool and on error handling, send your questions to chemSHERPA Help Desk.

chemSHERPA Help Desk

<https://chemsherpa.net/english/help>

We may, if necessary, ask you to complete a new survey for production materials, using the latest version of chemSHERPA-AI/CI data entry support tool or the substances list, even if you have already completed an earlier survey. This will depend on the laws and regulations governing substances in products and the changes in the new version of chemSHERPA-AI/CI.

If we find that surveys using chemSHERPA-AI/CI cannot meet regulatory requirements or the requirements of Epson's customers, we may ask you to complete a survey other than chemSHERPA-AI/CI.

Thank you for your cooperation in Epson's survey on chemical substances in products.

Revision History

Rev.	Date	Page	Revised Content Before => After	Reason
1.0	August 29, 2018	All	Rev. 1.0 was issued
